Suite for Excel is a professional collection of Excel add-ins that puts at your disposal a wide variety of worksheet editing tools that simplify your work. Description

System Requirements For Ultimate Suite For Excel:

Preferably a desktop computer, as it is the only way to play on Linux. You need to have Python 3.x (version 3.4, or later) installed. Python 3 is included in Ubuntu and other distributions, but if it's not installed you can get it here You need PyGObject installed, which is included in Ubuntu and other distributions. If you have these installed, we recommend making the launchers folder a system folder. If not, you can create it with the following command: `mkdir ~/.local/share/`
